SUMMARY

iOS and Web Developer with fastidious attention to detail, proven ability to work within teams and strong background in fast-paced, work environments. Has a love of taking a stab at new challenges at work and new people while fencing on the weekends.

TECHNICAL SKILLS

Strong: Ruby, Swift, JavaScript, HTML, CSS, Microsoft Office Suite, Microsoft Publisher, Microsoft Project, Adobe Photoshop

Experienced: Objective-C, React, Python, Core Data, AVFoundation, Core Graphics, jQuery, SQL, Firebase, Adobe InDesign

PROJECTS

Gnomad site · github   2017

Created in only 8 days, this mobile-first single page web app allows travelers (gnomads) to connect to city residents (localhosts) in order to have an authentic local experience of their travel destination.
- Built with a React front end and a Rails based API backend
- Using ActionCable websocket for a real-time chat experience between users
- Verification using Facebook authentication

FridgeDoors github   2016

Keep your shopping list up to date with everyone in your household.
- Built with Swift in Xcode and a Firebase backend
- Team used Agile development practices
- Updates in real time, keeps a record of who purchased what, so everyone can stay in sync
